# **Reproduction Number (Rt)**

The reproduction number is the number of people that one infected person will pass on a virus to, on average. If the reproduction number is higher than one, then the number of cases increase exponentially. If the number is lower the disease will eventually stop spreading, as not enough new people are being infected to sustain the outbreak. The current reproduction number (Rt) for the Midlands region can be found at <a href="https://www.gov.uk/guidance/the-r-number-in-the-uk">https://www.gov.uk/guidance/the-r-number-in-the-uk</a>.
