

COVID-19 – Solihull Data Summary, 11th February 2022

Summary

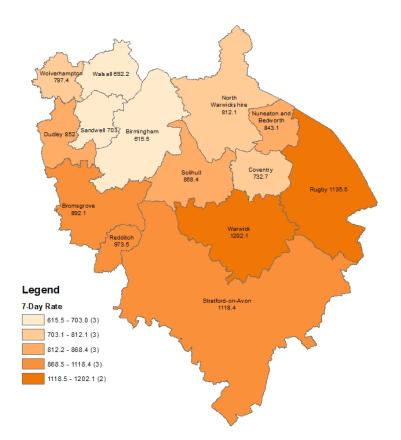

- The number of new cases was 1,879 in the 7 days to 4th February, a rate of 868.4 per 100,000 population, a decrease of 23% on the previous 7 days.
- Information about COVID-19 vaccine uptake by cohort and electoral ward is given in this bulletin.
- At 10th February, there were 336 COVID-19 positive inpatients in University Hospitals Birmingham NHS Foundation Trust hospitals, compared with 379 on 3rd February.
- There were 4 COVID-19 related death(s) of a Solihull resident in w/e 28th January (deaths registered up to 5th February). (Source: ONS).

Weekly Cases and Rates

COVID-19 cases are defined as an individual with at least one confirmed positive test from a polymerase chain reaction (PCR), rapid lateral flow test (LFT) or loop-mediated isothermal amplification (LAMP) test. Positive rapid lateral flow test results can be confirmed with PCR tests taken within 72 hours. If the PCR test results are negative, these are not reported as cases.

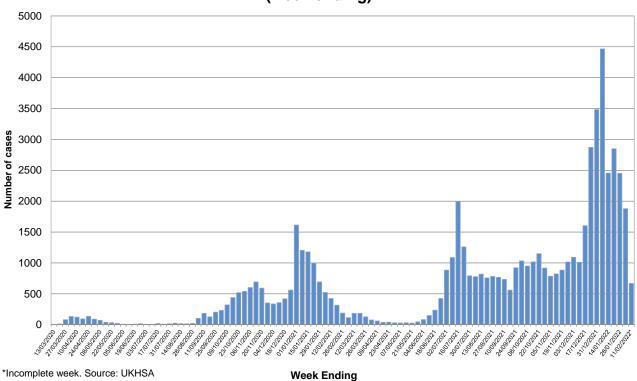

New Cases

In the 7 days to 4th February, Solihull had 1,879 COVID-19 cases, a rate of 868.4 per 100,000 population. This was a decrease of 23% on the previous 7 days.

The breakdown of cases in Solihull by week over time is shown below. It should be noted that case numbers prior to May 2020 are not directly comparable as there was much more restricted access to testing at that time.

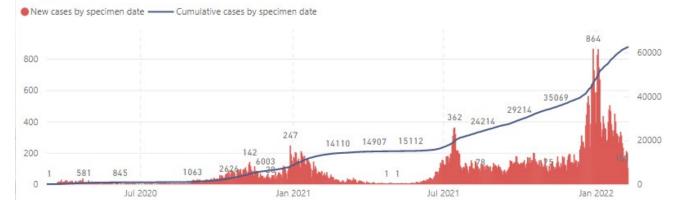

Number of weekly COVID-19 cases in Solihull since 13 March 2020 (week ending)

Total Cases

The total number of lab-confirmed cases in Solihull since the start of the pandemic was **62,359** on **9**th **February**. The cumulative number of cases over time is shown in the graph below; the full-sized version of this chart can be found at <u>https://coventry-city-council.github.io/covid-19/dashboard/#solihull</u> (note that is continually updated and chart below is at a point in time – run late on **10**th February).

Number of New Cases by Ward

The table below shows the number of new lab-confirmed cases by ward for the 14 days **between 24**th January and 6th February 2022. The number of new cases in the previous 14 days is also shown for comparison. It should be noted that, as electoral wards are relatively small areas, the wards with highest and lowest number of cases are liable to change.

Ward Name	Number of cases 10 th January – 23 rd January	Number of cases 24 th January – 6 th February					
Bickenhill	309	227

Reproduction Number (Rt)

The reproduction number is the number of people that one infected person will pass on a virus to, on average. If the reproduction number is higher than one, then the number of cases increase exponentially. If the number is lower the disease will eventually stop spreading, as not enough new people are being infected to sustain the outbreak. The current reproduction number (Rt) for the Midlands region can be found at https://www.gov.uk/guidance/the-r-number-in-the-uk.

Vaccinations

The table below shows coverage of the first dose of the COVID-19 vaccine by age group, priority group, and electoral ward at 7th February 2022. Data is on Birmingham and Solihull CCG registered patients who are resident within Solihull.

Within this category, 75% or more of the ward have been vaccinated

Within this category, less than 75% of the ward have been vaccinated

The following table shows coverage of the second dose of COVID-19 vaccine by electoral ward, age group, and priority group.

Increasing uptake in areas where fewer people have been vaccinated is a key local priority and area of focus for the local NHS & council, working with local communities. You can check if you are currently eligible for a vaccine and book an appointment at the following website: <u>https://www.nhs.uk/conditions/coronavirus-covid-19/coronavirus-vaccination/book-coronavirus-vaccination/</u>

Within this category, less than 75% of the ward have been vaccinated

The following table shows uptake of the booster/third dose of COVID-19 vaccine by electoral ward, age group, and priority group. A third dose of COVID-19 vaccine is given to people with a weakened immune system and is different to a COVID-19 booster dose. Uptake is calculated using the current population eligible for a booster or a third dose.

Within this category, less than 75% of the ward have been vaccinated

Hospital Inpatients

At 10th February, there were 336 COVID-19 positive inpatients in University Hospitals Birmingham NHS Foundation Trust hospitals, compared with 379 on 3rd February. This includes 14 in Intensive Treatment / High Dependency Units, compared with 19 on 3rd February. This will include a number of Solihull residents although the majority will be Birmingham residents (source: UHB Inpatient reports, 3rd February and 10th February).

University Hospitals Birmingham NHS Foundation Trust publish information several times a week at: <u>https://www.uhb.nhs.uk/coronavirus-staff/daily-statistics.htm</u>

Weekly Death Registrations and Occurrences (latest data published covers deaths occurred up to 28th January and registered up to 5th February 2022)

As of the week ending **28th January**, there have been **735** deaths of Solihull residents that mention COVID-19. **4** COVID-19 death(s) occurred in the latest week.

Further information is available on the Office for National Statistics death registrations page.
