

Solihull Public Realm Masterplan

Client: UK Central

The Council's Urban Designer led on the development of a Public Realm Masterplan for Solihull town centre.

This masterplan provides concept designs for areas of the town centre. These plans will be used to help make funding bids, and demonstrate to future developers and investors the Council's aspirations for the town centre.

The masterplan builds on the findings from previous Solihull town centre studies and the emerging masterplan for the town centre produced by AECOM.
