

HOW TO USE THIS MAP

This map forms part of a series of interactive maps that show all sources of flooding in Solihull Metropolitan Borough, as well as other supporting map layers. Clicking on a grid square in this map will open a separate interactive PDF map that has options for turning on and off the map layers of interest.

Further information on the source and background of the information contained within the interactive PDF can be found in the Strategic Flood Risk Assessment and by clicking on the 'Background to Mapping Information' box in this map and the interactive PDFs.

Mapping Supporting Information
