1. Introduction

1.1. Background

The 2013 Solihull Local Plan (SLP), adopted in December 2013, sets out a long term spatial vision for how the borough of Solihull will develop sustainably between 2011 and 2028. It focuses on twenty-one core policies to deliver the spatial strategy. Policy P7 (Accessibility and Ease of Access) identifies a range of accessibility criteria that new developments are expected to meet, in order to focus development in the most accessible locations, enhance existing levels of accessibility and promote ease of access. The accessibility criteria for proposed housing developments are set out as follows:

- Within an 800m walk distance of a primary school, doctor's surgery and food shop offering a range of fresh food; and
- Within a 400m walk distance of a bus stop served by a commercial high frequency bus services (daytime frequency of 15 minutes or better) providing access to local and regional employment and retail centres; and/or
- Within an 800m walk distance of a rail station providing high frequency services (three or more per hour during peak periods) to local and regional employment or retail centres.

Atkins was commissioned by Solihull Metropolitan Borough Council (SMBC) in 2015 to examine the accessibility criteria in relation to accessibility to local facilities and public transport infrastructure, to inform the evidence base for the SLP review. A systematic approach was adopted whereby consideration was given initially to areas of the Borough which met the Policy P7 criteria set out in 2013 SLP. A further assessment was undertaken whereby relaxations to the Policy P7 criteria were applied for the SLP review. The final part of the assessment involved the relative comparison of 294 sites put forward as part of the SLP review call for sites against the Policy P7 criteria.

SMBC is currently undertaking a Local Plan Review (LDR). A summary of representations to the Draft LDR was reported to Cabinet Members in July 2017, and subsequently an updated summary of representations and Call for Sites Schedule was made available. The summary of representations document provides an overview of all of the comments submitted relating to this study and is arranged by question or site reference.

Atkins has been commissioned by SMBC to conduct an update of the initial study conducted to examine the criteria in relation to accessibility to local facilities and public transport infrastructure in relation to 2013 SLP Policy 7 criteria and relaxations of this. In addition, a review and update of the relative comparison of 294 sites put forward as part of the LDR review call for sites against the Policy P7 criteria has been conducted. This study also contains responses to comments within the summary of representations which relate to the previous iteration of the accessibility study.

1.2. Report Purpose

This report sets out the methodology applied in the commission and informs the evidence base for the review of the 2013 SLP. Responses to comments within the summary of representations which relate to the previous iteration of the accessibility study have also been provided.

1.3. Report Structure

This report comprises the following:

- **Chapter 2** sets out the methodology used to produce isochrones for the accessibility criteria set out in the 2013 SLP (P7);
- **Chapter 3** describes the methodology for producing isochrones demonstrating relaxations of the accessibility criteria set out in the 2013 SLP (P7);
- **Chapter 4** details the methodology for assessing the relative accessibility of 294 potential residential sites against accessibility criteria set out in the 2013 (P7);
- **Chapter 5** provides responses to comments raised within summary of representations; and
- **Chapter 6** summarises and concludes the report.

2. Access to Local Facilities

2.1. Introduction

The section of the report sets out the methodology used for the first part of the accessibility study, which produced a set of isochrones to demonstrate areas which fall within the 2013 SLP criteria for maximum walking distances to local facilities and public transport infrastructure.

2.2. Walking Network

The distances set out in the accessibility criteria provided in Policy P7 of the 2013 SLP relate to walking distances to the given facilities. In order to examine access to local amenities and bus/rail services, a comprehensive network of walking routes had to be assembled in ArcMap (GIS Software). This layer was created using road network, shared cycle routes and public rights of way information. For off-road routes, further criteria were applied which required the route had to be surfaced and lit.

The following provides details of the methodology used to obtain a comprehensive network of suitable walking routes:

- Ordnance Survey (OS) Integrated Transport Network (ITN) Road Network Layer – provided by SMBC and includes all classifications of road including minor access roads. This was edited to remove roads which were unsuitable for walking along, including motorways e.g. M42 (and slip roads) and dual carriageways with no pedestrian facilities e.g. A452. It was assumed that where there is no specific infrastructure for pedestrians on country/rural roads that these would still most likely be used by pedestrians in these areas.
- Shared Use Cycle Routes - SMBC provided data for shared use cycle routes. These were classified as 'suitable' for the purposes of this study, if the route was lit. This was assessed using data provided by SMBC which gave the location of lamp posts. The selection of these routes was further verified using Google StreetView to make sure that this condition was met. Unlit routes which ran through parks in dense urban areas, were kept in the dataset as it could be considered that during the majority of the day (when most of the facilities would be accessed) and summer months (when there are longer daylight hours and walking is more likely) they would be useable. For the purposes of this study, any shared cycle routes which ran directly alongside the road were removed to avoid duplication of the road network.
- Public Rights of Way (PROW) - SMBC provided data for PROWs. These were assumed to be suitable if they had a metalled surface and were lit. Those which met these criteria were then manually verified using satellite imagery. PROW routes which were blocked or obstructed were also removed from the dataset. Unlit routes which ran through parks in dense urban areas, were kept in the dataset as it could be considered that during the majority of the day (when most of the facilities would be accessed) they would be useable. For the purposes of this study, any shared cycle routes which ran directly alongside the road were removed to avoid duplication of the road network.

These three datasets were then merged to create the comprehensive walking network for use in the assessment.

Walking Routes were included for up to 800m outside of the Solihull Borough Boundary, as this allowed the study to account for facilities which were outside of the borough boundary, but within acceptable walking distances of areas within the Borough.

The existing infrastructure included in the walking network is considered to be up to date at the time of undertaking the study. It does not allow for proposed infrastructure that would be delivered as part of any future development within the Borough.

2.3. Preparation of Isochrones

Isochrones were created using the Network Analyst extension of ArcMap (GIS software). This used the walking network to create isochrones in 100m bands, up to the maximum acceptable distance for each facility set out in the 2013 SLP. The bands used for each facility are shown in Table 2-1.

Table 2-1 - Isochrone bands for each facility

Facility	2013 SLP Criteria (m)
Bus Stops	100, 200, 300, 400
Food Shops	100, 200, 300, 400, 500, 600, 700, 800
Primary Schools	100, 200, 300, 400, 500, 600, 700, 800
GP Surgeries	100, 200, 300, 400, 500, 600, 700, 800
Rail Services	100, 200, 300, 400, 500, 600, 700, 800

2.4. Access to Local Amenities

To examine access to local amenities, the following criteria were assessed:

- The primary schools which were included in this study were state primary schools within Solihull Borough Boundary only. This data was provided by SMBC, which was considered to be up to date therefore required no further verification. Special Educational Needs schools were not included as these tend to have much wider catchment areas. The primary schools from the initial study were checked against the list of primary schools provided on the SMBC website¹. It is assumed that this information is up to date. A full list of primary schools used in the study is included in **Appendix A**.
- The GP surgeries which were included in this study were NHS facilities which fell within the Borough and up to 800m beyond the Solihull Borough Boundary. This data was provided by SMBC and verified for the purposes of the updated analysis using Google Streetview and the NHS website². A full list of GP Surgeries used in the study is included in **Appendix A**.
- The food shops which were included in this study were all permanent, fresh fruit and vegetable retailers within the Borough and up to 800m beyond the Solihull Borough Boundary. The Department for Transport (DfT) food shops database³ (which includes major supermarkets, discount food shops and chain convenience stores including Spar, Co-Op and Costcutter) and data provided by SMBC, using licensing information held internally, was used. In order to verify that all food shops selling fresh fruit and vegetables had been accounted for, a manual search was conducted in all areas not already covered by an 800m buffer (actual walking distance) using an Internet search. Markets were not included as they are not a permanent source of fresh fruit and vegetables. For the purposes of the previous study, a manual verification of all food shops (including those provided by SMBC) was conducted, to make sure that they were still in operation at the time of the verification and sold fresh fruit and vegetables. This was carried out using websites of larger retailers, Google Streetview, phone calls, and site visits to smaller retailers. A full list of food shops, including those removed as part of the verification process, is included in **Appendix A**. Two retailers located in Birmingham Airport were included in the analysis, however, it is important to note that these may not be viable food shops for members of the public to access on a regular basis. In agreement with SMBC, no update of the food shops provision has been conducted for the purposes of this updated assessment as it is considered any changes in provision would not make a material difference to the results of the analysis.

¹ Primary Schools – data from 2018 from SMBC website <http://www.solihull.gov.uk/Resident/Schools-learning/findschool/infant-and-primary>

² GP surgeries – data from February 2018 from NHS website www.nhs.uk

³ DfT food shops database – data from 2011 for stores which sell fresh fruit and veg from www.data.gov.uk

2.5. Access to Bus Services

The 2013 SLP sets out that new residential developments should be within a 400m walking distance of a bus stop served by a commercial high frequency bus services (daytime frequency of 15 minutes or better) and/or within an 800m walk distance of a rail station providing high frequency services (three or more per hour during peak periods) to local and regional employment and retail centres. Therefore, bus stops which provided a cumulative daytime frequency of 15 minutes or better which provide access to local and regional employment and retail centres, have been considered in this part of the assessment.

TRACC⁴ was used to extract bus stops which met this criteria, whose coordinates were then mapped in GIS software. Table 2-2 details the conditions which were used to extract data from TRACC.

Table 2-2 - Criteria for data extracted from TRACC

Time of Day/Week	NPTDR ⁵ Datasets	Criteria
Daytime Frequency	Date: July 2018, Regions: 420, 430, 200	Monday, 7am – 7pm

Bus stops within the borough and up to 400m beyond the Solihull Borough Boundary, were included in the study.

The number of services at each bus stop per hour between the hours of 7am-7pm were extracted from TRACC. Then within each bus service criteria the average number of bus services per hour was calculated for each bus stop and values were rounded. For example, the 2013 SLP bus criteria stipulated a daytime frequency of 15 minutes or better, the time period used was a Monday in July 2018 7am-7pm and values greater than 4 at each bus stop were included. A full list of the bus stops and service frequency utilised in this assessment, is included in **Appendix A**.

2.6. Access to Rail Services

To examine access to Rail Services, railway stations within the Borough and up to 800m beyond the Solihull Borough Boundary were included in the study. Policy P7 states that proposed housing development should be within an 800m walk distance of a rail station providing high frequency services (three or more per hour during peak periods) to local and regional employment and retail centres and/or within a 400m walking distance of a bus stop served by a commercial high frequency bus services (daytime frequency of 15 minutes or better. Following instruction from SMBC, only railway stations which had at least three services per hour (07:00-08:00, 08:00-09:00, 16:00,17:00, and 17:00-18:00) in at least one direction during peak periods (07:00-09:00 and 16:00 to 18:00) were included.

Berkswell and Hampton in Arden Railway Stations have been included as relaxations of 2013 SLP criteria, as there are at least three services per hour to any destination regardless of direction, as agreed by SMBC.

For the purposes of this update, a verification of the previous data was conducted using the National Rail website⁶. This process identified that there have only been minor changes to timetabling at each of the railway stations, not affecting which stations were included in this study. A full list of the railway stations is included in **Appendix A**.

2.7. Map Outputs

Maps of services and amenities which meet the criteria set out in the 2013 SLP are in shown in **Figure 1A-F**, provided in **Appendix B**. The aggregate isochrone plan showing all areas meeting local facility, bus and rail criteria in the 2013 SLP, overlaid with the 294 sites put forward as part of the SLP review call for sites, is set out in **Figure 1G**.

Figure 1A to F – Criteria set out in 2013 SLP

⁴ TRACC – software used to assess multi-modal transport accessibility

⁵ NPTDR – National Public Transport Data Repository, July 2018 dataset (9th July – 15th July)

⁶ National Rail Website - <http://www.nationalrail.co.uk/>, February 2018

- A. Isochrone of up to 800m walk distance to primary schools in 100m bands;
- B. Isochrone of up to 800m walk distance to GP Surgeries in 100m bands;
- C. Isochrone of up to 800m walk distance to food shops in 100m bands;
- D. Isochrone of up to 400m walk distance to bus stops served by commercial bus services with a cumulative daytime frequency of 15 minutes or better;
- E. Isochrone of up to 800m walk distance to a rail station which is served by at least three services per hour in at least one direction during peak periods (07:00-09:00 and 16:00 to 18:00); and
- F. Aggregate isochrone of all areas meeting all local facility, bus and rail criteria in the 2013 SLP.
- G. Aggregate isochrone of all areas meeting all local facility, bus and rail criteria in the 2013 SLP overlaid with 294 housing sites from SLP review call for sites.

3. Relaxation of 2013 SLP Criteria

3.1. Introduction

Due to the modest coverage of all Policy P7 criteria, relaxations of these criteria and additional public transport criteria were also mapped, as part of the SLP review. This section of the report sets out the methodology used for this part of the assessment. The same facilities and walking network were used as set out in **Section 2**.

3.2. Preparation of Isochrones

Isochrones were created using the Network Analyst extension of ArcMap GIS software. This used the walking network to create isochrones in 100m bands beyond to the maximum acceptable distance for each facility set out in the 2013 SLP. The relaxation bands used for each facility are shown in Table 3-1.

Table 3-1 - Isochrone bands for each facility

Facility	2013 SLP Criteria (m)	Relaxation of 2013 SLP Criteria (m)
Bus Stops	100, 200, 300, 400	500, 600
Food Shops	100, 200, 300, 400, 500, 600, 700, 800	1000, 1200
Primary Schools	100, 200, 300, 400, 500, 600, 700, 800	1000, 1200
GP Surgeries	100, 200, 300, 400, 500, 600, 700, 800	1000, 1200
Rail Services	100, 200, 300, 400, 500, 600, 700, 800	1000, 1200

3.3. Additional Bus Services Criteria

In addition to the bus criteria set out in the 2013 SLP, Atkins was commissioned by SMBC to consider additional criteria as follows:

- Cumulative daytime frequency of 30 minutes or better which provide access to local and regional employment and retail centres;
- Cumulative evening and weekend frequency of 60 minutes or better;
- Cumulative daytime frequency of 15 minutes or better and evening/weekend frequency of 60 minutes or better; and
- Cumulative daytime frequency of 30 minutes or better and evening/weekend frequency of 60 minutes or better.

TRACC was used to extract bus stops which met these criteria, whose coordinates were then mapped in GIS software. Table 3-2 details the conditions which were used to extract data from TRACC.

The number of services at each bus stop per hour were extracted from TRACC. For each bus stop, the average number of services per hour was calculated for each of the time periods, rounded to the nearest whole number. This value was then utilised to identify which bus stops met the 2013 SLP criteria and subsequent relaxations. For example, to identify bus stops with a daytime frequency of 30 minutes or better, bus stops with an average of two or more services per hour on a Monday between 7am and 7pm were included.

Table 3-2 - Criteria for data excluded from TRACC

Time of Day/ Week	Criteria
Daytime Frequency	Monday, 7am – 7pm
Evening Frequency	Monday, 7am – 11pm
Weekend Frequency	Saturday, 7am – 7pm

Bus stops within the borough and up to 400m beyond the Solihull Borough Boundary were included in the study.

3.4. Map Outputs

Maps of relaxations of the 2013 SLP criteria for the SLP review are shown in **Figure 2A – F**, provided in **Appendix C**. Additional public transport criteria (not set out in 2013 SLP) are shown in **Figure 3A – D**, provided in **Appendix C**. Aggregate plans using these additional public transport criteria are shown in **Figures 4A-B**, also provided in **Appendix C**.

The aggregate plan using two relaxations of SLP criteria overlaid with the 294 sites put forward as part of the SLP review call for sites, is set out in **Figure 2G**.

Figures 2A to F – Relaxation of criteria set out in 2013 SLP

- A. Isochrone of up to 1.2km walk distance to primary schools banded by 2013 SLP compliant (up to 800m), +200m and +400m beyond the 2013 SLP criteria;
- B. Isochrone of up to 1.2km walk distance to GP Surgeries banded by 2013 SLP compliant (up to 800m), +200m and +400m beyond the 2013 SLP criteria;
- C. Isochrone of up to 1.2km walk distance to food shops banded by 2013 SLP compliant (up to 800m), +200m and +400m beyond the 2013 SLP criteria;
- D. Isochrone of up to 600m walk distance to bus stops served by commercial bus services with a cumulative daytime frequency of 15 minutes or better banded by 2013 SLP compliant (up to 400m), +100m and +200m beyond the 2013 SLP criteria);
- E. Isochrone of up to 1.2km walk distance to a rail station which is served by at least three services per hour in at least one direction during peak periods (07:00-09:00 and 16:00 to 18:00) banded by 2013 SLP compliant (up to 800m), +200m and +400m beyond the 2013 SLP criteria; and
- F. Aggregate isochrone of all areas meeting all local facility, bus and rail criteria in the 2013 SLP banded by 2013 SLP compliant and two further relaxations (up to 200m and 400m for local facilities and rail services and up to 100m and 200m for bus services) beyond the 2013 SLP criteria.
- G. Aggregate isochrone of all areas meeting all local facility, bus and rail criteria in the 2013 SLP banded by SLP compliant and two further relaxations (up to 200m and 400m for local facilities and rail services and up to 100m and 200m for bus services) beyond the 2013 SLP criteria overlaid with 294 housing sites from SLP review call for sites.

Figure 3A to D - Additional Public Transport Criteria (not set out in 2013 SLP)

- A. Isochrone of up to 600m walk distance to bus stops served by commercial bus service with a cumulative daytime frequency of 30 minutes or better in 100m bands;
- B. Isochrone of up to 600m walk distance to bus stops served by a commercial bus service within a cumulative daytime frequency of 30 minutes or better and evening/weekend frequency of 60 minutes or better in 100m bands;
- C. Isochrone of up to 600m walk distance to bus stops served by a commercial bus service within a cumulative evening and weekend frequency of 60 minutes or better in 100m bands; and
- D. Isochrone of up to 600m walk distance to bus stops served by a commercial bus service within a cumulative daytime frequency of 15 minutes or better and evening/weekend frequency of 60 minutes or better in 100m bands.

Figure 4A to B – Aggregate Plans for Additional Public Transport Criteria (not set out in 2013 SLP)

- A. Aggregate isochrone of all areas meeting all 2013 SLP facility criteria, 2013 SLP rail and/or additional Public Transport Criteria (Bus stops served by cumulative daytime frequency of 30 minutes or better) banded by 2013 SLP compliant and two further relaxations (up to 200m and 400m for facilities and rail services and up to 100m and 200m for bus services) beyond the 2013 SLP criteria.
- B. Aggregate isochrone of all areas meeting all 2013 SLP facility criteria, rail and/or additional Public Transport Criteria (Bus stops served by a service with a cumulative daytime frequency of 30 minutes or better an evening/weekend frequency of 60 minutes or better) banded by 2013 SLP compliant and two further relaxations (up to 200m and 400m for facilities and rail services and up to 100m and 200m for bus services) beyond the 2013 SLP criteria.

4. Housing Site Accessibility

4.1. Introduction

This section summarises the methodology used to carry out a relative assessment of accessibility from 294 potential residential sites in the Borough, based on existing infrastructure and facilities. The sites were identified as part of the SLP review call for sites. It then goes on to describe the methodology used for providing additional consideration for new facilities/infrastructure and the assessment of the suitability of walking routes.

The assessment was again carried out based on accessibility on foot and does not consider accessibility for other modes. The local facilities and public transport infrastructure identified in the first part of the assessment have been utilised. Sites defined as solely for ‘employment’, or ‘educational’ land uses have not been included in the assessment.

4.2. Points of Access

Potential site access points have been identified in order to assess each of the 294 potential residential sites against the accessibility criteria set out in policy P7 of the 2013 SLP. These site access options have not been subject to technical review for their feasibility and are just intended to give an indication of accessibility.

For each site, a point of access was located at the mid-point of every section of public highway or Public Right of Way (PRoW) bordering the site. This resulted in some sites having multiple site accesses. These coordinates were plotted in GIS software to produce the plan shown in **Figure 5A (Appendix D)**. The accessibility score provided for each facility represents the best accessibility from any point of access for that site. Sites with multiple site accesses were given a minimum and maximum accessibility score. However, for the purposes of further assessment the minimum accessibility score has been utilised, as shown in **Appendix E**.

For those sites which do not border an existing road, a point of access has been provided on the nearest road. In some cases, this was provided through another potential site, and this has been noted in the summary spreadsheet provided in **Appendix E**.

4.3. Accessibility Assessment

4.3.1. Access to Local Facilities

To calculate an accessibility score for access to local facilities, GIS software was used to calculate the distance from each access point to the nearest facility. The distance to the nearest facility for each site was then identified. Each site was assigned an accessibility score, as shown in Table 4-1. The accessibility to these facilities is based only on distance and does not consider available capacity at these facilities.

Those sites which were fully compliant with the 2013 SLP criteria, or compliant within one or two relaxations were given a defined score. Those which were beyond the greatest relaxation (*), were banded and given a score within the bands defined in Table 4-1, based on distance to the nearest facility, relative to the other sites.

Table 4-1 - Scoring for Accessibility to Local Facilities

Band	Primary School	Food Store	GP Surgery
Policy P7 Accessibility Criteria (up to 800m) and provision of new facilities	100	100	100
Relaxation 1 (up to 1000m)	80	80	80
Relaxation 2 (up to 1200m)	60	60	60
Beyond (over 1200m)	5 – 50*	5 – 50*	5 – 50*

4.3.2. Access to Public Transport

To calculate an accessibility score for access to local facilities, GIS Software was used to calculate the distance from each access point to the nearest facility. The distance to the nearest facility for each site was then

identified. The accessibility criteria is for bus **and/or** rail, therefore, each site was given a score that represents the highest score for bus or rail accessibility, as shown in Table 4-2. For example, if a site scores 80 for bus accessibility and 60 for rail accessibility, the site would be awarded a score of 80 for public transport accessibility. This assessment does not take into consideration capacity on bus and rail services.

Those sites which were fully compliant with the 2013 SLP criteria, or compliant within one or two relaxations were given a defined score. Those which were beyond the greatest relaxation (*), were banded and given a score within the bands defined in Table 4-2 based on distance to the nearest facility, relative to the other sites.

Table 4-2 - Scoring for Accessibility to Public Transport Services

Band	Bus Services	Rail Services
Policy P7 Accessibility Criteria (up to 400m for bus and 800m for rail) and provision of new facilities	100	100
Relaxation 1 (up to 500m for bus and 1000m for rail)	80	80
Relaxation 2 (up to 600m for bus and 1200m for rail)	60	60
Beyond (over 600m for bus and 1200m for rail)	5 – 50*	5 – 50

4.3.3. Total Accessibility Score

The total of the accessibility scores for each type of local facility and public transport, have been added together to provide a total accessibility score for each potential housing site. The 294 sites have then been ranked according to the total score. The higher the accessibility score, the more accessible that site is deemed to be. This is provided in the separate summary spreadsheet. The map provided in **Figure 6A (Appendix F)** shows the total accessibility score for each of the potential housing sites ranked relative to each other (banding in quantiles) from least accessible locations in red to most accessible locations in green. At the request of SMBC, **Figure 6B (Appendix F)** shows the total accessibility score for each of the potential housing sites where green sites are those with the highest accessibility score, and red sites are those with the lowest. This score does not reflect the possibility of taking multiple, adjacent sites forward together.

4.4. Provision of New or Improved Facilities and Infrastructure

4.4.1. Provision of New Facilities and Infrastructure

Some of the sites provided by SMBC were identified as potentially providing a school or retail facilities, based on guidance presented in *Sustainable Settlement: A Guide for Planners Designers and Developers* in relation to the number of dwellings provided on the site. SMBC provided the housing allocations for some of the sites, however, for those where no housing allocation was provided, an assumption of 30 dwellings per hectare has been used. For sites that were of a sufficient size to justify the provision of a school/retail facilities, a comment has been provided in the summary spreadsheet (**Appendix E**) in relation to the impact that the provision of these facilities would have on accessibility from adjacent residential sites.

It has also been identified that some of the potential sites for development will result in the loss of local facilities, for example school premises. Those sites at which accessibility will be affected (either an improvement or reduction) have been identified, and a comment has been provided in the summary spreadsheet (**Appendix E**).

SMBC have identified that there are a number of committed infrastructure schemes which are likely to come forward during the duration of the SLP review that will affect access to local facilities and public transport infrastructure. The impact of future transport infrastructure or development on the proposed site submissions will be assessed by the Council.

4.4.2. Suitability of Walking Routes

In order to identify sites which may use '*unsuitable*' walking routes to access local facilities and public transport infrastructure, the assessment has identified sites that currently have access onto a road with no footway provision.

A manual search was conducted to identify if there was footway provision along the frontage of the site. For the purposes of this assessment, no consideration has been given to the adequacy of the provision, for example the width or quality of the footway. A comment has been provided for each site in the summary spreadsheet (**Appendix E**), as follows:

- No footway provision along site frontage –at least one road fronting the site does not have footway provision.
- Footway provision along site frontage – all roads fronting the site have footway provision.

5. Consultation responses

5.1. Introduction

As part of the Local Plan review process, SMBC provided Atkins with a schedule of representations relating to the first iteration of this study. This section of the report provides responses to the comments made within this schedule.

5.2. Responses

Within the schedule of representations, a number of comments have been provided relating to the previous study, primarily regarding the accessibility scoring and provision of facilities within the study area. Responses to these comments are provided in Table 3.

Table 3 - Responses to comments in schedule of representations

Comment No	Brief Description	In-depth description	Representor and Submission ID	Council comment	Atkins comment
1	Findings of the Accessibility Study and Evidence base on topic papers (pages 78 and 79) are flawed.	<ul style="list-style-type: none"> Conclusion that Balsall Common has medium to high accessibility and therefore suitable for growth is not justified. Berkswell Station identified as a high frequency transport hub, however it does not meet the criteria set out in the accessibility report. The east of Balsall Common will be one of the least accessible locations in the whole of the Borough until at least 2026 because of the impact on the transport infrastructure of the construction of HS2. Phasing of development in Balsall Common needs to be considered after HS2 construction. It would be wilfully negligent of the Council to fail to manage the growth by phasing new housing in Balsall Common before 2026. 	3122 - Balsall Parish Council (Sheila Cooper)	<p>The Council has commissioned a Balsall Common Transport Study, being carried out by Mott MacDonald. This seeks to highlight the potential impacts of housing growth in Balsall Common, including the need or not of a bypass and how this might be integrated with other projects and plans in the surrounding area, e.g. HS2.</p> <p>This study when complete will provide a Transport Feasibility Study to substantiate the findings of the Accessibility Mapping Study in relation to Balsall Common.</p> <p>In terms of train frequency Appendix A confirms that there are 3 trains per hour in one direction during peak hours, but not necessarily between 7 – 8 and 8 – 9. Request Atkins sharpen up definition within the Accessibility Mapping Report.</p>	Definition within Section 2.6 of this report has been updated to ensure that train frequency criteria is clear. Note, that in agreement with SMBC for the initial study, Berkswell and Hampton in Arden Railway Stations were included as relaxations of the 2013 SLP criteria. These stations had at least three services in <u>any</u> direction.
3	Accessibility Study Mapping Report should be corrected to include an assessment of sites 153 and 154 forming part of proposed Site 9, currently omitted from the appraisal.	NOTE: Land south of Knowle (between Station Road, Warwick Road and Grove Road) – Site 9 in the Draft Local Plan. Comprises sites SHELAA site 1010 (including 148, 149, 151, 152, 153, 154 and 156)	6057 - P Benton and T Neary (Submitted Laura Pohl, Tyler Parkes)	Request Atkins amend Appendix E of Accessibility Report to include details of sites 153 and 154.	Sites 153 and 154 are allocated for educational land uses. The assessment of these sites is beyond the scope of this study.
4	Inaccurate accessibility mapping scores resulting in flaws in the evidence base.	<p>Barrage report disagrees with the scoring given to a number of sites within evidence base documents. Claim that evidence base is flawed and that Balsall Common is not an accessible settlement.</p> <p>The phasing of any development in Balsall Common must recognise the impact and disruption of HS2.</p>	3479 - Barrage	<p>Request Atkins clarify position concerning train and bus frequency. Appendix A confirms that there are 3 trains per hour in one direction during peak hours, but not necessarily between 7 – 8 and 8 – 9. In terms of bus services the relaxation of the 2013 SLP standards equals a cumulative daytime frequency of 30 minutes.</p> <p>Phasing needs to be backed up by Infrastructure Delivery Plan, particularly having regard to the impact in the village of housing sites coming forward in the first 1-5 year period and HS2.</p> <p>Request Atkins delete reference to dual carriageway within comments section relating to site 75 within Appendix E of the accessibility study</p>	<p>Definition within Section 2.6 of this report has been updated to ensure that train frequency criteria is clear. Railway stations must have services meeting the criteria within all hours during peak periods to be included within the study. Note, that in agreement with SMBC for the initial study, Berkswell (Balsall Common) was included as relaxations of the 2013 SLP criteria. This station has at least three services in <u>any</u> direction.</p> <p>Within Balsall Common, there are no bus stops with a daytime frequency of 15 minutes or better within 400m walking distance of any of the sites. Therefore, sites do not meet 2013 SLP criteria. Balsall Common only meets one of the relaxation criteria – 600m walk of services with a daytime frequency of 30 minutes or better.</p> <p>Reference to dual carriageway has been removed.</p>

Comment No	Brief Description	In-depth description	Representor and Submission ID	Council comment	Atkins comment
5	Inaccurate accessibility mapping score given to site 1013 (Land rear of 146 – 152 Tilehouse Lane) leading to its subsequent omission from the DLP.	In relation to site 1013 (SHELAA sites 18 and 116) the comment in the report under 'suitability of walking and cycling routes' states that there is no footway provision along the site frontage. This is factually incorrect and the report should be amended accordingly. The frontage of the site along Tilehouse Lane benefits from an existing footway, which has street lighting and links the site with Whitlock's End facilities to the south, bus stops and the railway station to the north. The site therefore has safe pedestrian access to facilities and public transport.	4506 - P Benton and T Neary (Submitted Laura Pohl, Tyler Parkes)	Request that Atkins make the following corrections to the Accessibility Mapping Report: <ul style="list-style-type: none"> Assessments need to be carried out for SHLAA sites 153 and 154 forming part of Housing Allocation 9; The comment that the site has no footway provision along the site frontage is incorrect. Safe footway access links the site northwards to the railway station and southwards to local facilities. (SHELAA Sites 18 and 116). 	Sites 153 and 154 are allocated for educational land uses. The assessment of these sites is beyond the scope of this study. Text in appendix has been updated to reflect the footway provision along the frontage of sites 18 and 116.
6	Object to the omission of SHELAA site 209 (Tidbury Green Golf Club) on the grounds of soundness, lack of robust accurate evidence, and non-compliance with national policies.	As described previously.	4509 - Tidbury Green Golf Club (Submitted Laura Pohl, Tyler Parkes)	Representor alleges that there are inaccurate accessibility mapping scores, however no corrections suggested. Request Atkins review scores for site 209.	Following the update of the accessibility study, the score for site 209 (Tidbury Green Golf Club) is 290. This score is lower than the original assessment due to changes in the relative banding for score assignment.
7	Accessibility Mapping should be corrected to include an assessment of sites 153 & 154, forming part of proposed Site 9, currently omitted from the appraisal.	As described previously	4509 - Tidbury Green Golf Club (Submitted Laura Pohl, Tyler Parkes)	Request that Atkins make the following corrections to the Accessibility Mapping Report: Assessments need to be carried out for SHLAA sites 153 and 154 forming part of Housing Allocation 9 (south of Knowle).	Sites 153 and 154 are allocated for educational land uses. The assessment of these sites is beyond the scope of this study.
8	The 'accessibility' scoring information contained in the Accessibility Mapping Report is inaccurate and misleading and does not factor in that accessibility can change overtime	In relation to evidence on SHELAA Site 19 (Land at the rear of Bakehouse Lane and Wheeler Close, Chadwick End) the 'accessibility' scoring information contained in the Accessibility Mapping Report is considered to be inaccurate and misleading. It does not accurately represent the situation on the ground for Rural Exception Sites, taking into account that bus service frequency and capacity can change over time. Furthermore, an assessment of the suitability of a site to be allocated for affordable housing will differ from predominantly open market allocations. Rural Exception Sites are allocated very much on the basis of the need for that housing in that location.	4518 - Mrs A Curtis (Submitted Laura Pohl, Tyler Parkes)	Request Atkins provide further explanation as to how the accessibility scoring is determined in relation to Rural Exception sites.	A standard assessment methodology for all housing sites has been developed, to allow for comparison between sites. Therefore, it is not deemed appropriate to alter the scoring for Rural Exception sites. This study does not take into consideration any future improvements to public transport provision which may come forward as a result of future development.
9	Accessibility Mapping report should be corrected to include an assessment of sites 153 & 154, forming part of proposed Site 9, currently omitted from the appraisal.	See previous description.	4518 - Mrs A Curtis (Submitted Laura Pohl, Tyler Parkes)	11Request that Atkins make the following corrections to the Accessibility Mapping Report: <ul style="list-style-type: none"> Assessments need to be carried out for SHLAA sites 153 and 154 forming part of Housing Allocation 9. 	Sites 153 and 154 are allocated for educational land uses. The assessment of these sites is beyond the scope of this study.
11	Land south of Hampton Lane/ West Ravenshaw Lane/	See previous description	4521 - Submitted Laura Pohl, Tyler	Request that Atkins make the following corrections to the Accessibility Mapping Report:	Sites 153 and 154 are allocated for educational land uses. The

Comment No	Brief Description	In-depth description	Representor and Submission ID	Council comment	Atkins comment
	Former Pinfold Nursery (67 Hampton Lane) The Accessibility Mapping Report should be corrected to include an assessment of sites 153 & 154, forming part of proposed Site 9, currently omitted from the appraisal.		Parkes on behalf of client	<ul style="list-style-type: none"> Assessments need to be carried out for SHLAA sites 153 and 154 forming part of Housing Allocation 9. 	assessment of these sites is beyond the scope of this study.
12	In relation to SHELAA Site 1017 (Land at Wootton Green Lane, Balsall Common). Inaccurate accessibility mapping scores.	Where large sites are assessed the accessibility score will not reflect the true accessibility of the most distant area of a parcel of land making up the proposed housing allocation.	4524 - Landowners Wootton Green Lane (submitted Laura Pohl, Tyler Parkes on behalf of client	Request Atkins make amendments to the scoring given with in the Accessibility Mapping Report to reflect the most distant areas of large parcels of land. The scores given to sites may then be more even.	At larger sites, more than one site access may be provided. For the purposes of this assessment, where sites have multiple site accesses, the minimum accessibility score has been taken. Appendix E has been updated as part of this assessment to also provide the maximum accessibility score for sites where more than one site access has been assumed to allow for SMBC to conduct sensitivity testing in the future.
13	Accessibility Mapping: Should be corrected to include an assessment of sites 153 & 154, forming part of proposed Site 9, currently omitted from the appraisal	See previous description.	4524 - Landowners Wootton Green Lane (Submitted Laura Pohl, Tyler Parkes)	Request Atkins amend Accessibility Mapping Report to include an assessment of sites 153 & 154, forming part of proposed Site 9, currently omitted from the appraisal	Sites 153 and 154 are allocated for educational land uses. The assessment of these sites is beyond the scope of this study.
14	In relation to SHELAA Site 64 (Land at Barston Lane/ Oak Lane). Inaccurate accessibility mapping scores.	Bus stops lie within 200m of the site, accessed via lit pavements. Although it is acknowledged that, at present, the frequency of the bus service is less than required for the Policy P7 Accessibility Criteria, the stops are within the 400m distance and, of course, bus service frequency and capacity can change over time, linked to demand and investment. In addition, an assessment of the suitability of a site to be allocated for affordable housing will differ from predominantly open market allocations - Rural Exception Sites are allocated very much on the basis of the need for that housing in that location. A need has been proven for affordable housing in the Rural Areas of the Borough and it is important that this need is met through the allocation of Rural Exception Sites.	4530 - Cosmic Fireworks (Submitted Laura Pohl, Tyler Parkes)	Request Atkins investigate claims that the 'accessibility' scoring information contained in the Accessibility Mapping Report is inaccurate and misleading in that it does not accurately represent the situation on the ground for Rural Exception Sites, taking into account that bus service frequency and capacity can change over time.	A standard assessment methodology for all housing sites has been developed, to allow for comparison between sites. Therefore, it is not deemed appropriate to alter the scoring for Rural Exception sites. This study does not take into consideration any future improvements to public transport provision which may come forward as a result of future development.
15	Accessibility Mapping: Should be corrected to include an assessment of sites 153 & 154, forming part of proposed Site 9, currently omitted from the appraisal.	Accessibility Mapping should be corrected to include an assessment of sites 153 & 154, forming part of proposed Site 9, currently omitted from the appraisal.	4530 - Cosmic Fireworks (Submitted Laura Pohl, Tyler Parkes)	Request that Atkins make the following corrections to the Accessibility Mapping Report: Assessments need to be carried out for SHELAA sites 153 and 154 forming part of Housing Allocation 9 (south of Knowle);	Sites 153 and 154 are allocated for educational land uses. The assessment of these sites is beyond the scope of this study.
16	The Accessibility Mapping Report has not undertaken a correct assessment of Site 19 (HS2 Interchange Site or site 132 of the SHELAA). A	Appendix E presents a list of the potential site allocations that have been assessed and their respective sustainability scores for comparative purposes. The Consortium is concerned however that the Arden Cross development (Site ref: 132) has not been assessed with the following explanation provided 'This one can't be done as not attached form'. As a result, the Arden Cross site secures a score of 50 which is one of the lowest scores from all of the proposed allocations.	4651 - Arden Cross Consortium (Submitted by Mat Jones, Turley Associates)	Request that Atkins reappraise site 19 (SHELAA site 132), taking into account Turley's report 'Representations to the Draft LPR Interim Sustainability Appraisal Report'.	Following the update of the accessibility study, this site (Site 132) scores 75 (previously scored 50).

Error! No document variable supplied.

Comment No	Brief Description	In-depth description	Representor and Submission ID	Council comment	Atkins comment
	reappraisal using available information is required.	<p>Given that the location of the Arden Cross development is well known, the Consortium are concerned that a correct assessment has not been undertaken and request that the Council provide an explanation and subsequently carry out a reappraisal using the available information.</p> <p>To assist the Council with this re-appraisal, the Consortium have carried out an assessment of the Arden Cross site using the methodology within the SAM and note the following;</p> <p>(i) There are bus services on the southern boundary of the site along the A45. (ii) The Birmingham International Rail station is located approximately 1km to the west of the site. (iii) There is a convenience food store in addition to other shops and facilities within the neighbouring National Exhibition Centre (NEC).</p> <p>Based on these services, this would provide an indicative score of 240 which would substantially increase its sustainability rating from the current score of 50.</p>			<p>The bus stops along the southern boundary of the site do not meet the 2013 SLP criteria of a daytime frequency of 15 minutes or better. The only service which uses this stop is the number 223 services which operates ones on a Monday.</p> <p>The minimum distance between the identified site access points for site 132 and Birmingham International Rail Station is 2,732km based on the walking network used in this study (score of 35 in line with banding criteria). However, it is recognised that these site access points are only indicative and therefore if built-out that distances to the nearest Railway Station may be shorter.</p> <p>The minimum distance between the identified site access points for site 132 and food shops within NEC/Birmingham Airport is 3,134m based on the walking network used in this study (score of 30 in line with banding criteria). However, it is recognised that these site access points are only indicative and therefore if built-out that distances to the nearest food shop may be shorter. It should be noted, as mention in Section 2.4 these two food shops within Birmingham Airport included within this study may not be viable food shops for members of the public to access on a regular basis.</p> <p>Based on the size of the site, this site would have a suitable population for a Primary School, Doctors Surgery and corner shop. Although the scores provided do not reflect this, this should be taken into consideration when appraising this site further.</p> <p>Therefore, it is considered that the score of 75 provides a robust reflection of the sustainability of this site.</p>

Comment No	Brief Description	In-depth description	Representor and Submission ID	Council comment	Atkins comment
20	Object to the misleading assessment of SHELAA sites 29 (The Orchard, Earlswood Road) and 210 (The Paddock, Land between 39 – 79 Earlswood Road), the inaccurate accessibility mapping scores	<p>Under the distance criteria set out in the report, The Orchard site should score: 80 not 50 for accessibility to food store (i.e. the site is less than 1000m away); and 60 not 45 for accessibility to GP practice and high frequency rail service (i.e. the site is up to 1200m away). Therefore, the correct total accessibility score for the site should be 255 not 195. This score shows that the site is currently more accessible than parts of proposed Housing Allocations 1, 2, 3, 9, and 16. This demonstrates that the site is in a sustainable location within easy access of services, facilities and buses immediately adjacent.</p> <p><u>The Paddock</u></p> <p>Under the distance criteria set out in the report, The Paddock site should score: 80 not 60 for accessibility to food store (i.e. the site is less than 1000m away); and 60 not 50 for accessibility to GP practice and high frequency rail service (i.e. the site is up to 1200m away). Therefore, the correct total accessibility score for the site should be 260 not 220. This score shows that the site is currently more accessible than parts of proposed Housing Allocations 1, 2, 3, 9, and 16. This demonstrates that the site is in a sustainable location within the easy access of services, facilities and buses immediately adjacent.</p>	3935 - Mrs S Catton (Submitted by Laura Pohl, Tyler Parkes)	<p>Assessments need to be carried out for SHELAA sites 153 and 154 forming part of Housing Allocation 9.</p> <p>Request Atkins reappraise scores for SHELAA sites 29 and 210 to determine whether or not they need to be corrected, e.g. 'The Paddock' site to increase by 40 to 260 and 'The Orchard' site score to increase by 60 to 255.</p>	<p>Sites 153 and 154 are allocated for educational land uses. The assessment of these sites is beyond the scope of this study.</p> <p>As the banding for distances for individual facility scores beyond the SLP criteria is based on the relative distribution of distances, some of these have altered between versions of the assessment. Site 21 now scores 185 (previously scored 250), Site 29 scores 165 (previously scored 195) and Site 210 scores 195 (previously scored 220). Changes to availability in bus services and refinements to the primary school assessment has also resulted in scores to change.</p>
21	<p>SHELAA Site 59 (Golden End Farms)</p> <p>In the Accessibility Report the site is identified as one of the most accessible sites in the Borough. There are however factual errors in the assessment which when corrected result in the site securing a maximum score. Very few other sites achieve this</p>	<p>The Accessibility Report identifies the Golden End Farms site is one of the most accessible in the Borough, scoring 360 out of a maximum score of 400.</p> <p>Notwithstanding the above, the report does contain a few errors which mean that the site should have received an even higher accessibility score than set out in the report.</p> <p>Firstly, the report scores accessibility to the GP surgery as only 80 out of 100. In fact, due to the existence of the public footpath from Kixley Lane to Knowle High Street the site should actually score the full 100 points in respect of this criterion as the Surgery is within 800m.</p> <p>Secondly, in respect of access to public transport, the Assessment scores the bus accessibility as 80 out of 100 (suggesting that the bus provision is over 500m from the site). In fact the site is less than 400m away from bus stops in front of Knowle Parish Church which provide frequent services to various destinations (bus routes 87, 88, 233, 514, S3). Furthermore there are also recently installed bus stops on Kenilworth Road itself very close to the site with an hourly service to Solihull and Coventry (bus route 87). We therefore consider that the scoring with regard to bus services should be 100.</p> <p>If the accessibility scores are corrected in line with our comments above, the site receives a total score of 400.</p> <p>On a further point, the Accessibility Assessment notes that there are no footways provided along the site frontage. That is factually incorrect. There is a footway along the whole length of the Kenilworth Road frontage. A footway is also provided on the opposite side of Kixley Lane</p>	3913 - David Green, Delta Planning.	<p>Request Atkins review the scoring allocated to SHELAA Site 59 (Golden End Farms) in the Accessibility Assessment;</p> <ol style="list-style-type: none"> 1. Accessibility to GP surgery should score 100 instead of 80, due to the existence of a footpath between Kixley Lane and Knowle High Street. 2. Accessibility to public transport should score 100 instead of 80 as the site is less than 400m from bus stops in front of Knowle Parish Church, which provides frequent services to various destinations. <p>The report should be corrected to state There is a footway along the whole length of the Kenilworth Road frontage. A footway is also provided on the opposite side of Kixley Lane.</p>	<p>The footpath between Kixley Lane and Knowle High Street has not been included within the walking networks of this study as it is not lit. Therefore, the accessibility scores for site 59 have not been updated for access to GP Surgery provision.</p> <p>Accessibility to public transport scores 80 as the site is 409m from the bus stops in front of Knowle Parish Church. It should be noted that this distance has been calculated based off an indicative site access point and this should be taken into consideration in any further appraisal of these sites.</p> <p>Text within appendices has been amended to reflect footway along Kenilworth Road and Kixley Lane, both of which are frontages to site 59.</p>

6. Summary and Conclusion

6.1. Summary

Atkins has been commissioned by SMBC to conduct an update of the initial study conducted to examine the criteria in relation to accessibility to local facilities and public transport infrastructure in relation to 2013 SLP Policy 7 criteria and relaxations of this. In addition, a review and update of the relative comparison of 294 sites put forward as part of the LDR review call for sites against the Policy P7 criteria has been conducted. This report has also provided responses to comments within the summary of representations which relate to the previous iteration of the accessibility study.

This assessment is a technical document to support the evidence base for the Local Plan Review and site selection process. The purpose of this assessment is to compare settlements and housing site submissions on a like-for-like basis against current accessibility levels. The outputs of the study indicate where accessibility levels would require improvement to sustainably accommodate new residential development. It is beyond the scope of this study to evaluate the capacity of facilities or public transport corridors nor assess the impacts of the aggregated site submissions. It is for the Council to give due consideration to the findings of this report in the Local Plan Review.

6.2. Conclusion

It is considered that this study provides a systematic assessment of accessibility within the Solihull Borough Boundary, and that outputs can be used for future assessment of the accessibility from potential housing sites identified in the SLP review call for sites.
